

AWARDS GRANTED TO OUR BUSINESS UNITS

(Ranked by countries' alphabetic order)

AWARDS GRANTED BY THE PROFESSION INSTITUTIONS	TYPE OF AWARD	COUNTRY	DIVISION	ASSOCIATION WHO GRANTED THE AWARD	THE STORY
	Environmental Award	Canada	A&C	Alberta Roadbuilders and Heavy Construction Association (ARHCA)	The Alberta Roadbuilders and Heavy Construction Association Environment Awards recognize member company's achievements that respect or enhance the environment. Lafarge A&C Western Canada Region Greater Edmonton's Anthony Henday Drive Project received an award from the ARHCA for efforts in reducing environmental impact during operations and activities.
	First Price – “Best environmental practices”	France	A&C	UNPG	Lampourdier quarry won the First Price in the environmental category of the UEPG (European Union of Aggregates producers) Award held in April at the ministry of ecology, energy and sustainable development. This contest aimed at promoting best practices in the aggregates industry. The quarry was recognized for its efforts in setting up materials methods of transportation respecting the environment.
	Second price – “Society economic contribution”	France	A&C	UNPG	La Roche-en-Brenil quarry (Côte-d'Or) was granted by the Second Price in the economic category of the UEPG ceremony. The quarry was recognized for reconvertng into development platform of bio resources.

	Grand Price – “Partnership with local community”	France	A&C	UNPG	<p>Lafarge Aggregates North and the Rivecourt quarry (Oise) were granted by the Grand Price in the social category of the UEPG ceremony. The quarry was recognized for promoting major paleontological discoveries. Rivecourt’s quarry has caught the attention of the jury for the expertise developed in collaboration with a local structure, for the enhancement of natural heritage and culture. Indeed, the site contains a pool of amber and fossils of great interest and scientific heritage, including the understanding of climate change. Aware of the palaeontological interest for the science community and the general public, Lafarge Aggregates North and EIPC joined for the search on amber and fossils. This partnership, initiated in 2000, helped develop many activities on the topics of paleontology, geology and biodiversity.</p>
	3 quarries reach the Level 4 - Unicem Environment Charter	France	A&C	UNICEM	<p>Vimpelles, de Barbey and la Brosse Montceaux Lafarge quarries reached level 4, the highest of the Environment Charter UNICEM. This award distinguishes the improvements made on those sites in favor of environmental protection and regional biodiversity. These quarries present practical and effective arrangements for</p> <ul style="list-style-type: none"> - Environmental Protection - Preservation of biodiversity - Inclusion of local stakeholders
	Level 4 - Unicem Environment Charter	France	A&C	UNICEM	<p>Lafarge Chateau-Gontier (53) quarry has won the level 4 of the Environment Charter of the National Union of Industry careers and building materials (UNICEM). This is the highest level of the Charter. This award distinguishes the improvements made on this site for the protection of environment and regional biodiversity. The site of Chateau-Gontier is part of the 51 Lafarge quarries in France which have reached the Level 4 of the UNICEM Environmental Charter.</p>
	Level 4 - Unicem Environment Charter	France	A&C	UNICEM	<p>Lafarge Montricoux career (82) has reached the Level 4, the highest of the Environment Charter of UNICEM. This award distinguishes the improvements made on this site in favor of environmental protection and regional biodiversity. Lafarge Montricoux quarry is the first site to receive such a distinction in Midi-Pyrenees. It joins the other 50 Lafarge quarries which have already reached the Level 4 in France.</p>

	<p>Level 4 - Unicem Environment Charter</p>	<p>France</p>	<p>A&C</p>	<p>UNICEM</p>	<p>For his efforts in favor of environmental protection and regional biodiversity, Lafarge Fercé-sur-Sarthe quarry (72) has won the level 4 of the Environment Charter of UNICEM. This is the highest level of the Charter. 51 is the total number of Lafarge quarries in France which have reached the Level 4 of the Environmental Charter of UNICEM. Thus, Fercé-sur-Sarthe quarry (72) received the diploma that rewards staff for their actions for environment and sustainable development. Lafarge initiated important work to reduce dust, taking care of the sprinkler system tracks and creating a secure area for tarping trucks.</p>
	<p>2009 Sustainability Champion</p>	<p>UK</p>	<p>Cement</p>	<p>British Precast Concrete Federation</p>	
	<p>Health & Safety Best Practice Award</p>	<p>UK</p>	<p>A&C</p>	<p>Mineral Product Association</p>	<p>Lafarge A&C UK received recognition in various categories at the Mineral Product Association's Health & Safety Best Practice Awards held October 6 in London. The Higham Coating Plant and Wivenhoe Asphalt Plant have received a Certificate of Merit in the Worker Involvement category. For Engineering Initiatives, Boroughbridge Readymix Plant has received a Certificate of Merit. Sector Supervisor Robin Marshall at M25 J29 & Cricklewood Readymix Plant and Plant Supervisor Richard Fortune at Boroughbridge Readymix Plant have both received Individual Recognition.</p>
	<p>Restoration Best Practice Special Award</p>	<p>UK</p>	<p>A&C</p>	<p>European Aggregates Association (UEPG)</p>	<p>Lafarge Aggregates has won Restoration Best Practice Special Award at the 2010 Sustainable Development Awards for supporting the National Memorial Arboretum in Alrewas, Staffordshire. The Arboretum on the site of one of Lafarge's former sand and gravel quarries has restored it to an area of beauty, a haven for wildlife and a place of great historic importance. Ecology and the environment have been at the forefront of the site's development, with more than 50 000 trees planted to create parkland. Lafarge was also recognized for the creation of the NMA.</p>

	<p>2 Eagle Awards for Environmental Sustainability</p>	<p>US</p>	<p>A&C</p>	<p>Georgia Construction Aggregates Association</p>	<ul style="list-style-type: none"> - 1st place granted to Lafarge Friendship, Georgia Aggregates - 2nd place granted to Lafarge Douglasville, Georgia Aggregates
	<p>Eagle Award for Community Relations (1st place)</p>	<p>US</p>	<p>A&C</p>	<p>Georgia Construction Aggregates Association</p>	<p>Granted to Lafarge Douglasville, Georgia Aggregates</p>
<p>National Stone, Sand & Gravel Association </p>	<p>Communication Relations Award Bronze Medal</p>	<p>US</p>	<p>A&C</p>	<p>NSSGA</p>	<p>Award granted to Lafarge Texas, Georgia Aggregates</p>

AWARDS GRANTED BY THIRD PARTIES	TYPE OF AWARD	COUNTRY	DIVISION	INSTITUTION WHO GRANTED THE AWARD	THE STORY
	<p>2 Endeavour Awards Finalist in two categories</p> <ul style="list-style-type: none"> - Safety Scheme of the Year - Environmental Solution of the Year 	Australia	Plasterboard	Manufacturers' Monthly	<p>Lafarge Plasterboard's commitment to safe and sustainable manufacturing processes has been recognised by the Manufacturers' Monthly Endeavour Awards, having been selected as a finalist in two categories - Safety Scheme of the Year and Environmental Solution of the Year. The company's safety program, Is Your Safety Radar ON – Supervisor Training, was selected for successfully driving the safety message through all levels of the business. The Stormwater Harvesting System at the company's Matraville plant, has also been selected as a finalist for the category - Environmental Solution of the Year.</p>
	"Ouro Azul" (Golden Blue)	Brazil	A&C	Ministry of Mines and Energy	<p>Lafarge A&C received a very prestigious Brazilian award called "Ouro Azul" (Golden Blue). This award was granted by the Ministry of Mines and Energy as a way to recognize initiatives for the protection and rational use of water resources. The competitors were big companies like Vale, Arcelor Mittal, Fiat and another Brazilian concrete company called Supermix. In fact, the A&C project of water has been a success: the economy in consumption reached 81 million liters of water in 2010!</p>
	"Hugo Werneck prize of Sustainability and Love to nature"	Brazil	Cement	Ecológico Magazine	<p>Lafarge Cement Brazil received in december 2010 the "Hugo Werneck prize of Sustainability and Love to nature" for an ad published at the Ecológico Magazine. Hugo Werneck was a famous brazilian environmentalist, who died in 2008. There were 20 categories and Lafarge was indicated in the "advertising campain" one. The ad was about Lafarge having reached the CO2 emissions reduction one year in advance. The headline is "We promised to</p>

					reduce the carbon emission in 20% until 2010, but we have not fulfilled our promise: we reached the target in 2009". The text explains our agreement with WWF and that we continue to work on sustainable programs for a better world.
	Rookie of the Year	Canada	A&C	Wildlife Habitat Council (WHC)	Lafarge A&C Western Canada Region Northwest Area Lethbridge Hudson Pit received the Wildlife Habitat Council's "Rookie of the Year" award, under their corporate lands for learning program. This award recognizes the best new biodiversity program. Through key partnerships with the College of Lethbridge, Alberta Conservation and various youth groups, The Lethbridge team established a variety of outstanding biodiversity projects, including: native plant re-vegetation, bat and water fowl habitat enhancement, and community engagement education.
	Excellence award for occupational Health & Safety	Greece	Cement	Association of Greek Advertised Companies	Heracles received a CSR Excellence Award for occupational Health & Safety, during the ceremony of the CSR Excellence Awards organized by the Association of Greek Advertised Companies with the co-operation of the Hellenic Network for CSR and the Hellenic Management Association and under the auspices of the Ministry of Culture and Tourism, on Wednesday February 3rd 2010.
	Third place in the category of "Great Business"	Honduras	Cement	Honduran Foundation of Corporate Social Responsibility (FUNHDARSE)	Lafarge Cementos Honduras won the third place in the category of "Great Business" in the "Business Prize to Sustainable Development" offered by the Honduran Foundation of Corporate Social Responsibility (FUNHDARSE) (22 July 2010)
	Socially Responsible Client	Honduras	Cement	HSBC-HONDURAS	Lafarge Cementos Honduras won the recognition of "Socially Responsible Client" on the part of the banking institution HSBC-HONDURAS (November 2010)

	Commendation of the Ministry of Environment	Korea	Cement	The Korean Institute of Landscape Architecture	Lafarge Halla Cement won the Commendation of the Minister of Environment for an ecological landscape architecture in quarry rehabilitation at the 5th Korea Landscape Architecture Grand Prize run by The Korean Institute of Landscape Architecture. It is the first award in the cement industry. It also means that every effort for quarry rehabilitation of LHC was well recognized. It has been doing differential process and activities on quarry rehabilitation and environmental preservation such as 'Trial Rehabilitation', 'Operation of transplanting site', 'Quarry Monitoring Committee', and 'Partnership Movement for Environmental Conservation'. With these consistent activities, LHC has got a strong and earnest trust from the experts and environmental NGOs including government bodies and our case is a model case internally and externally.
	Best Environmental Compliant Firm	Kenya	Cement	National Environmental Management Authority (NEMA)	
	Gold Award - Comprehensive Workplace Programs Partnership Award	Kenya	Cement	USAID (United States Agency for International Development)	
	Silver Award	Kenya	Cement	Total Eco Challenge	

	1st Runners Up - Corporate Social Responsibility	Kenya	Cement	Financial Reporting Awards	
	Best Corporate - Promotion of Socio- Economic Development	Kenya	Cement	Kilifi County Council	
	Presidential Titanium award for Environmental, Safety and Health Management	Philippines	A&C	BAAC	The Presidential Mineral Industry Environmental Award (PMIEA) recognizes outstanding levels of dedication, initiative and innovation in the pursuit of excellence in environmental management by exploration, mining and other related entities involved in various aspects of mineral utilization. The scope of the environmental management includes among others, programs/projects being implemented for the environmental protection and enhancement of mining areas, development of the host and neighboring communities, land use improvement, exploration and mining site rehabilitation and final decommissioning.
	2010 Environmental Leadership Award	Philippines	Cement	WWF-Philippines	Lafarge Cement Services (Philippines) Inc. has added another laurel to its growing collection of environmental honors after winning a 2010 Environmental Leadership Award at the recently concluded WWF Partners' Night. Along with eight other companies, Lafarge Philippines was recognized by WWF-Philippines for introducing initiatives that mirror the environmental organization's commitment to steering the planet towards a more sustainable path. WWF's Environmental Leadership Awards are given to corporations which demonstrate clearly that corporate responsibility is an integral part of their organization. Among the projects that Lafarge Philippines will undertake with WWF is a research activity which will analyze the impact of Blended Cement. This achievement reflects Lafarge's global partnership with WWF and its aim of spearheading

					innovations in the cement industry in an effort to fight climate change. By influencing public policy and industry leaders, Lafarge hopes to encourage a more sustainable construction industry in the Philippines.
	Quality mark "Solid Cement"	Poland	Group Cement	Polish Cement Association	<p>Lafarge Cement has received the right to use the quality mark "Solid Cement" awarded by the Polish Cement Association. It proves that Lafarge meets the highest quality standards of its products at all stages: production, packaging and distribution. A special mark of the highest quality products "Solid Cement" has been introduced by SPC to meet the needs of customers. The purpose of this activity is to promote the products of the highest quality and to protect customers against products which do not meet the quality requirements.</p> <p>Certificate awarding has been preceded by detailed control procedure of the products. This mark will be placed on cement bags. Now, after the control procedure we have the right to put it on our products and use it in our promotion.</p>
	Top Managers Award	Romania	Gypsum	Business Magazine	<p>Sorin Boza was awarded with the "Think Big" special distinction at Business Magazine Top Managers Gala. Sorin was voted Lafarge Romania Manager of the year 2009. He was selected for the impressive industrial accomplishment – the clicker silo dome in Medgidia cement plant.</p>
	Environment Protection Award	Romania	Cement	Brasov County Agency	<p>Hoghiz Cement Plant received the Environment Protection Award for minimizing its impact on environment (air) after it was nominated by the Brasov County Agency.</p>

	Recognition diploma for building materials and volunteers	Romania	All BUs	Various organizations	Lafarge (all BUs) supported through different organizations (but mainly Habitat for Humanity) the reconstruction efforts in Northern Romania after the summer floods disaster - the most affected community mayor of Dorohoi, Botosani county granted us a recognition diploma for building materials and volunteers.
	EXCELLENCE in CSR	Romania	All BUs	National Movement "Millions of people - millions of trees"	LAFARGE companies in Romani won the "EXCELLENCE in CSR" granted by the National Movement "Millions of people - millions of trees", to for its 2009-2010 edition
	Best Place to Work	Spain	Cement	Great Place to Work® Institute	The Best Workplaces 2010 study has ranked Lafarge Cement Spain as one of the 50 Best Companies to Work for. This is the only company in this field of business listed as Best Work Place thanks to its good working environment, credibility, respect, and fairness. The results are a true reflection of the employers' views and almost all of them (nearly 90%) have highlighted that they feel secure, they can work in autonomy and take time off work for personal matters.
	Responsible Sourcing of Construction Products scheme	UK	Aggregates	BRE	Lafarge Aggregates has earned recognition for its sustainable approach to supplying products. The division, part of Lafarge Aggregates & Concrete UK, received a Very Good, three stars rating in the Building Research Establishment (BRE) Responsible Sourcing of Construction Products scheme. The scheme is a BRE Environmental and Sustainable Standard and a new framework under the British Environmental Standard (BES) banner. It is designed to encourage and promote responsibly sourced materials on a company level and provide customers and stakeholders with confidence that a firm's products have been responsibly sourced. Assessment is made on carbon emissions, resource use, waste management, and transport as well as impact on employment,

					skills and local communities.
	Carbon Trust Standard	UK	A&C		Lafarge's commitment to sustainability was recently celebrated by the achievement of the Carbon Trust Standard.
	Yorkshire Rural Awards	UK	A&C		Dry Rigg quarry was highly commended for environmental category of awards
	BES 6001 Responsible Sourcing Certificate	UK	Cement	BRE Global	Lafarge UK Cement has been awarded the prestigious BES 6001 Responsible Sourcing Certificate developed by BRE Global. The "Very Good" classification applies to all bulk and packed cements from Lafarge Cement as well as its packed ready-to-use range. To meet the BRE scheme's strict criteria, Lafarge Cement had to demonstrate compliance in 3 categories: organisational management, supply chain management and environmental and social issues.
	<p>4 awards</p> <ul style="list-style-type: none"> - Environmental Supplier of the Year - Marketing Initiative of the Year - Heavyside Supplier of the Year - Prestigious Supplier of the Year award 	UK	Cement	National Buying Group (NBG)	Nominated and voted for by the NBG's 70-strong membership, representing over 240 individual branches, the awards celebrate the very best of the UK's building product manufacturers. Lafarge Cement UK won all four awards in the categories for which we were eligible at the Manchester-based ceremony. As well as scooping Environmental Supplier of the Year, Marketing Initiative of the Year and Heavyside Supplier of the Year, Lafarge Cement stole the show with the NBG's prestigious Supplier of the Year award. NBG have over 150 suppliers. It is an outstanding achievement to be awarded four such prestigious accolades. Each of these demonstrates the investment and effort going in to enhancing the service for merchant customers.

	<p>Construction News Specialist Awards 2010</p>	<p>UK</p>	<p>Readymix</p>	<p>Construction News</p>	<p>Lafarge Readymix has been 'highly commended' in the sustainability category at the Construction News Specialist Awards 2010. The awards aim to recognise and reward specialists within the construction sector over a range of categories including health & safety, sustainability and training. Attended by around 600 industry leaders, the commendation recognises the company's sustainability achievements; which includes a 'very good' rating for BES6001, the framework standard for responsible sourcing.</p>
	<p>Building Sustainability Awards 2010</p>	<p>UK</p>	<p>Readymix</p>	<p>Building Magazine</p>	<p>Lafarge Readymix was a recent finalist at the Sustainability Awards 2010 organised by leading industry Magazine, Building. Readymix's success came in the Sustainable Innovation of the year category for Extensia™ high strength, low-shrink concrete. The awards recognise and reward outstanding achievement in sustainability in the built environment and were held on 30 November at the Royal College of Physicians in London.</p>
	<p>Green Apple Environmental Award</p>	<p>UK</p>	<p>Readymix</p>	<p>The Green Organization</p>	<p>Lafarge Readymix UK has scooped the prestigious Green Apple Environmental Award for Extensia™ – low shrink concrete. The Green Apple Awards recognise, reward and promote environmental best practice around the world. Lafarge's prize for Extensia™ comes in the Environmental Best Practice section. Extensia™ needs no steel mesh or steel fibres, which makes it 100 per cent recyclable, offering a carbon emission saving of 20 per cent compared to conventional concrete.</p>
	<p>Green Hero Award</p>	<p>UK</p>	<p>Readymix</p>		<p>The success also sees Lafarge's invitation to join the International Green Heroes, an elite group of environmental achievers who use their experience to help thousands of others – and the environment – around the world.</p>

	Innovation Business Award	UK	Readymix	Constructing Excellence East Meadlands Regional Award	Awarded to Extensia™
	Finalist for the Green Solution Award	UK	Readymix	Sanska supply chain	
	Construct Innovation Award	UK	Readymix		Highly commended for Extensia™
	Green Business	UK	Readymix		Finalists for sustainability section and Extensia™
	Best Environmental initiative	UK	Asphalt & Pave	Airport Operators Association (AOA)	Lafarge Contracting provided runway rehabilitation services to Highlands & Islands Airports Ltd at Kirkwall Airport.
	Silver Award	UK	Asphalt & Pave	Considerate Constructors Scheme	Awarded for M4 Junction, 14-15 Baydon Major Maintenance.
	Award for the promotion of Health protection & Safety practices	Ukraine	Cement	CSR	The best cases of the companies on corporate social responsibility (CSR) 2010 were awarded on November 30 within the National Business Case Competition. The international jury selected the best cases out of 37 submitted by the companies from the whole country. Lafarge was awarded for its promotion of health protection and safety.
	9 International habitat conservation Awards	US	A&C	WHC	Nine of Lafarge North America's aggregate sites in the western United States gained international recognition from the Wildlife Habitat Council (WHC) for their contributions to wildlife habitat conservation. The aggregate sites recognized are located across Colorado – in Golden, Rifle, Fort Lupton, Lafayette and two in Longmont. In

					Arizona, the site is in Sun City, and in Wisconsin and Missouri the aggregate sites are found in Colgate and Defiance. Each aggregate mine/pit received its award in acknowledgment of its commitment to environmental stewardship and to increasing native biodiversity. Lafarge received the awards as part of the WHC's annual symposium, titled Evergreen: A Celebration of Conservation in a Changing World.
	Portland Cement Association Overall Environmental Excellence	US	Cement	PCA	The PCA awards program is open to any cement manufacturing plant in North America (Canada, Mexico, and the United States), and honours activities conducted during the previous calendar year (in this case, January to December 2009). As part of its climate change and energy efficiency programs, university researchers planted hybridized willow species at the facility and other crops as possible renewable biomass sources. The facility also worked with local farmers to raise crops for a future trial biomass burn, and more than 950 bales of plant material have been collected. The installation of new blower technology allowed the plant to improve kiln operation and increase its utilization of petroleum coke, an oil refinery byproduct. These actions will reduce sulfur and carbon dioxide emissions and lower fuel consumption. With additional kiln operation and quarry changes, the facility has nearly eliminated cement kiln dust (CKD) production. Likewise, the CKD monofills were improved because little to no CKD will be produced in the future. Lastly, with the help of 250 local scouts, leaders, and parents, the facility planted 3,000 trees on the property for habitat restoration and climate change education and mitigation.

	Portland Cement Association Environmental Performance	US	Cement	PCA	<p>The Lafarge Sugar Creek facility completed a range of projects in 2009 to increase the amount of alternative raw materials and fuels used by the plant while continuing to keep emissions significantly below permit limits. By connecting to a third source in 2009, landfill gas replaced 17% of the plant's fossil fuels, which would offset more than 30,000 tons of carbon dioxide from coal combustion. Modifications to its alternative solid fuels facility allowed the Sugar Creek plant to double the percent of fossil fuel replacement — to 20%. In 2009, the facility utilized limestone fines from an adjacent quarry to replace more than 14% of the limestone needs of the kiln. The plant also substitutes 35.8% of its non-limestone raw materials with a range of non-hazardous industrial wastes such as bottom ash, boiler slag, foundry sands, and mill scale.</p>
	Portland Cement Association Innovation Award	US	Cement	PCA	<p>In 2009, the Tulsa Lafarge plant took advantage of an alternative fuel opportunity that builds upon a waste stream the industry has been using for years. Most tire-derived fuel use is based on used tires, but the Tulsa plant worked with Goodyear, Inc., to divert rubber manufacturing waste from landfills into the cement kiln. The plant accepts bagged scrap rubber and malformed rubber components, which are delivered to a mid-kiln injection system by way of a high-angle conveyor. In addition, the plant utilizes 100% Biogas from a nearby landfill for the drying of raw materials and up to a 20% substitution of the kiln fuel needs.</p>
	<p style="text-align: center;">2 awards</p> First place prize in the Best CD's & DVD's Training for Industry award and Grand Prize Award for the best overall resource	US	Cement	MSHA	<p>Lafarge North America recently was recognized by the Mine Safety and Health Administration (MSHA) at its annual "Training Resources Applied to Mining" (TRAM) Conference held at the MSHA training academy in Beckley. Lafarge, not only received the first place prize in the Best CD's & DVD's Training for Industry award for their</p>

					"Safety Glasses Save Lives – The Adam Oliver Story" video, but that same video captured the highest level of recognition by winning the Grand Prize for the best overall resource. The video described the story and the lessons learned from a real-life incident that happened to Adam Oliver, a Lafarge employee, at its Davenport, Iowa Cement Plant. MSHA's 15 th annual conference gathers representatives from the mining community, including participants from academia, states programs, and coal, metal and non-metal mining industries, to share ideas and training around health and safety.
	6 Excellence in Concrete Awards	US	Ready Mix	Concrete Promotional Group	Lafarge North America's Kansas City Ready Mix operations was honored to receive six 2010 Excellence in Concrete Awards from the Concrete Promotional Group for projects completed in the Kansas City area. Among the six projects recognized was one of Lafarge's sustainable construction projects.
	Overall Concrete award	US	Ready Mix	Concrete Promotional Group	Additionally, Lafarge North America won the Overall Concrete award for its work on the Kansas City Zoo's Polar Bear exhibit. This project utilized all of Lafarge's Value Added Products: Agilia®, Chronolia®, Artevia® and Ultra Series® mixes.

AWARDS GRANTED TO THE GROUP

AWARDS GRANTED BY THIRD PARTIES	Type of Award	Country	GROUP	Institution who granted the Award	The story
	"Silver" rating	Global	Group	AccessiWeb and Euracert	Lafarge.com website has been recognized for its accessibility, earning it a "Silver" rating under the French Accessiweb label and an A grade from the European label, Euracert. In 2010, the 2 labels have been renewed after an external audit by Accessiweb.
	Second of the 75 French sites evaluated	Global	Group	Hallvarsson & Halvarsson	The Swedish communication agency Hallvarsson & Halvarsson's study places the website Lafarge www.lafarge.com second of the 75 French sites evaluated.
